

MW

Mike Wilcome

Professional Summary

Principal Engineer with expertise in Java, Spring Boot, and system architecture. Proven track record in leading cross-functional teams and mentoring engineers to drive impactful technology solutions.

Work History

Iron Bow Technologies | Soldierpoint | GovCIO - Principal Engineer

Remote

08/2024 - Current

- Led cross-functional teams to design and implement innovative technology solutions.
- Streamlined development processes, improving collaboration between engineering and operations teams.
- Mentored other engineers, fostering a culture of continuous learning and improvement.

Orange Bees - Technical Lead

Remote

08/2022 - 08/2024

- Served as full-stack Java developer and technical lead on multiple enterprise projects.
- Led API design and implementation using OpenAPI standards
- Coordinated technical delivery across teams, and worked directly on client-facing systems for Michelin and Comporium.

CommIT Enterprises, Inc. - Senior Software Engineering Lead

Charleston, SC

01/2020 - 08/2022

- Led backend engineering efforts for Veterans Affairs initiatives, including Sync My Health Data.
- Acted as sole backend architect and developer for multiple services, responsible for system design, implementation, and long-term maintainability.
- Worked closely with stakeholders to translate requirements into production systems.

Skills

- Java
- Spring Boot, JPA/Hibernate
- RESTful and contract-first APIs (OpenAPI)
- Angular (TypeScript/JavaScript, Signals, RxJS)
- Kotlin Multiplatform (shared logic and UI across Android, iOS, and Web)
- SQL and relational databases (PostgreSQL, Oracle, MongoDB)
- Event-driven systems (Kafka, RabbitMQ)
- System architecture
- Technical Mentorship

Education

Charleston Southern University

Charleston

Bachelor of Science: Computer Science
Focused on core computer science and engineering fundamentals, including

Strategic Operational Solutions (STOPSO) - Software Engineering Lead

Charleston, SC

08/2019 - 01/2020

- Led development on mobile and backend systems supporting Veterans Affairs applications.
- Contract role completed ahead of schedule, followed by continued work with the same VA groups through subsequent organizations.

Booz Allen Hamilton - Software Engineer

Charleston, SC

03/2015 - 04/2019

- Developed full-stack Java and Spring-based microservices supporting large Veterans Affairs platforms, including VBMS and document generation systems.
- Contributed to system modernization, service reliability, and performance improvements across mission-critical applications.

advanced data structures, system architecture, C++, Java, calculus, linear algebra, and physics. Coursework emphasized analytical thinking, problem solving, and preparation for professional software development.
